The school CE Joan XXIII and sustainability

Current environmental actions

The school still carries out the following different current actions in sustainability, which have been checked again:

- Art made by recycling materials to show colours and textures
- Build percussion music instruments recycling materials and test their sound
- Small garden at school to grow vegetables
- Selective sorting of waste for recycling
- Different teams of students sweep the playground after recess and separate recyclable materials
- Environmental Education and information about Agenda 21 plans
- Take care of students and staff health by selecting school menus

New actions and projects

Projects and new actions in our school for a better environment according to demands of students and staff, which are or will be implemented:

- New area for parking and secure bicycles against theft
- Change of taps of water with a timer to decrease water consumption
- Light and thermal insulation of all classrooms
- Measure Wi-Fi waves from the interior of the school to decrease radiation
