

SO ECO GREEN meeting in Grottaferrata April 8 – 12, 2014

## **JONAVA SENAMIESTIS GIMNASIUM, LITHUANIA**

### **Municipality and sustainability**

Jonava Senamiestis Municipal department for Environmental protection has recently carried out the following measures:

- New air cleaning filters have been installed in the chimneys of Jonava enterprises to reduce air pollution;
- River banks have been renovated to form a recreation area;
- Bicycle paths have been built;
- Mobile CCTV cameras have been installed to ensure the town-dwellers' safety and to observe how residents recycle wastes;
- A stokehold, which uses biological fuel, has been built;
- A recycling centre has been opened.

### **New projects:**

- Old buildings are being renovated to reduce the energy consumption used for heating;
- A sport centre is being built;
- A ski trail is under construction;
- A new educational programme on environmental issues of the region is being compiled;
- A project "Safe environment – safe Jonava".

### **Jonava Senamiestis gymnasium and sustainability**

#### **Current environmental actions:**

- A day without cars;
- Spring cleaning action "Let's do it";
- A forest for the coming generations;
- Installations, outfits, made of recycling materials;
- Wild animals need your assistance;
- Qualitative analyses of drinking water and that of water basins;
- Help stray animals.

#### **New actions and projects:**

- Modernize the school stadium, changing its cover and installing new equipment;
- Renovate the parking lot;
- Modernize the school heating system to save energy needed for heating the school building.
